Content Migration

Whether you are already on Drupal and need to upgrade or you're looking to rebuild in Drupal, Promet Source has you covered. We have experience with small migrations as well as large 100,000+ page websites. Promet Source will architect a project plan to seamlessly migrate your existing site. We will use the best tools and modules to migrate your content, users, and database. You can choose to keep your current design and functionality or take this as an opportunity to upgrade!

Why Migrate?

- Need to upgrade to D7 or D8
- Need to migrate from a legacy or proprietary CMS
- Need to control how, when, what and to whom content is displayed
- Looking for an open-source solution
- Looking for a CMS that is widely accepted and easily maintained
- Need complex integration, functionality and management
- Need a custom/ manageable solution to drive business
- Looking for a more secure CMS
- Looking to update/refresh site(s)

Process

- Discovery/ planning phase
- Wireframe creation
- Prototype build
- Evaluation
- Migration script creation
- Basic element migration
- Collaboration with client to establish milestones
- Continued content migration/ evaluation
- Site building to display content to wires
- Custom integration
- Custom development
- Final evaluation/ sign off
- Deployment

Why Promet?

- Experience with small, medium and large migration projects
- Experts of Drupal
- We implement best tools, modules and practices
- You can keep previously built content and functionalities
- Migrate in phases to ensure no downtime
- Front end developers can replicate your design
- We provide custom solutions and modules
- We provide support & maintenance once project is complete
- We provide Drupal training

Get Ready to Fly!

When you choose Drupal, Promet Source can help you with the migration. Our experts can migrate your site(s) to the Drupal platform, carrying over the content you've previously used on your old site. Our developers will transform the framework of your site while maintaining the functionality of your content. Looking to improve functionality? There are myriad integration and interaction solutions that out developers can build. We even offer Drupal training to empower your team with the tools to manage your site.

About

Founded in 2003, Promet Source is a leading interactive development firm that implements open source tools (specifically Drupal) to deliver high-value web and mobile application development & support. Promet offers a turn-key solution delivered by experts in the field: Sprint 0 planning (Agile concept development), design, architecture, development and deployment. After deployment, Promet provides ongoing support & maintenance. Our consultants have deep technical expertise and are recognized as leaders within the Drupal community. Promet serves clients globally across multiple industries-specializing in government, higher education, non-profits, start-ups, healthcare and professional services.
